

PORTABLE & SELF-CONTAINED

# MiniPak Dust Suppression System

The MiniPak dust suppression system is a self-contained dust suppression unit that requires no electricity to operate and is driven using source water pressure.

The system allows personnel to apply non-hazardous, non-toxic, and biodegradable agents wherever dust suppression is needed at the facility, whether in the load zone or by a haul road. Extremely useful at fixed locations like conveyor belts, moving operations, or construction vehicles that generate a significant amount of dust.

**NO Electricity Needed**

## FEATURES & BENEFITS

- One-person operation
- No power supply necessary
- Self-enclosed, portable unit; easily transportable
- Easy to install and operate
- Uses Benetech's non-corrosive, non-toxic, non-hazardous dust suppression agents
- Harmless to skin

## Benetech Chemicals

Benetech has a selection of dust suppression chemicals for all types of bulk material needs. Our cost-effective chemicals are formulated to reduce dust levels with PRB, lignite, gravel, wood chips, scrap metal recycling, taconite, biomass, petroleum and metallurgical coke, iron ore, sinter, clinker, and other materials.

## CHEMICAL FEATURES & BENEFITS

- Requires less equipment at fewer application points
- Cost-competitive agent
- Minimizes water addition
- Guaranteed to reduce airborne dust
- Environmentally-safe
